

Plant Type	Products	Quality	Utilize Equipment
A	Non Distillated FUELS	<p>Tyre oil will be crude black oil</p> <p>Plastic oil will be transparent with faint Yellow color</p>	The normal fuel oil having high carbon content can use in ships, boats, furnaces, heating boilers.
B	Distillated FUELS	Euro std. Pyrolysis fuel oil as clear as light transparent yellowish or water	The fuel oil quality can be directly used in vehicles includes cars, trucks, buses, power generators, ships, boats, furnaces
By Products	Processed GAS	Emission maintain std. Combustible Gas	It is used for the plant for the heating of reactor
	Carbon Black	Crude, Pelletized & Refined	<p>Crude carbon black is used for strengthen of road surfaces.</p> <p>Pelletized carbon black is used for heating the furnaces</p> <p>Refined carbon black is used for the pigment in textile industries, cartridges, etc..</p>
	Asphalt or Bitumen	Crude Asphalt or Bitumen	<p>Crude asphalt is used for road surfaces.</p> <p>Refined asphalt is used for waterproofing membrane for building roofs, floors</p>
	Ash	Crude ash	We can use for manufacturing light weight bricks for the buildings.
